60%

ENERGY  
SAVING

Extra Remote Control, Stand and Lamp are sold separately.

#### BENEFITS OF USING INFRARED HEATING

**Reduced energy use.** Save between 30 - 60% of the energy usage of traditional heating methods.

There is **less damp and mould** because infrared heating warms walls and keeps them dry.

**Infrared heating is 100% natural** for our bodies and well being.

**No maintenance or service required**, unlike water or fan assisted heating which require inspection and service.

**100% smart controlled** to ensure you only heat the space required at any time.

Professional installation recommended.
